TO WHOMSOEVER IT MAY CONCERN

We are an AS 9100-C certified manufacturer and have been using your customized bellows designing software (SPULLOWS) application since October 2012 for designing Metal Bellows including hardware like Flanges/ Tie rods, Sleeves etc. in our organization.

The following are a few features that we have found to be very useful

- Output as per EJMA (2009 Edition with addendum 2011) / ASME standards.
- Automatic generation of 1:1 scale drawing on AutoCAD with blocks and child-part detailing.
- Automatic generation of 1:1 scale 3D model (solidworks).
- Automatic generation of Quote (Customized costing calculations as per our formulas).
- Exhaustive output report with Design specifications, Design parameters, Environmental Background, Stress calculations and Manufacturing specifications.
- Advanced error checks with provision to generate design as per our manufacturing constraints.

This tool saves considerable time of ours and enhances the productivity, thereby enabling us to respond to our customers in time.

We have no hesitation in recommending this software programme.

For **Bhastrik Mechanical Labs Private Limited,**

D.A. KRISHNA
(Managing Director).
