

VAN MOPPES INDIA

TO WHOMSOEVER IT MAY CONCERN

We are a joint venture company of Amalgamations and Saint Gobain abrasives and a leading manufacturer of Diamond and CBN Tools and Grinding wheels.

We are Also ISO 9001 certified company.

We have been using "PROCESS ASSIST SOFTWARE " from Spudweb Technologies Private Limited since September 2013 for our manufacturing process.

The application enables us to generate sample drawings (as 2D Images) based on templates and also helps us to track each stage of the Manufacturing process. We also had some customizations done to the application which were well accommodated. Using the application we have generated many drawings pertaining to our processes so far, and it has been consistent in performance.

Process Assist saves a lot of time and makes tracking and approval of the manufacturing process much easier. We highly recommend this software to manufacturing industries.
